REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: claims 6 and 7 are patentable over the prior art patents and printed publications because of the specific low-resistance layer being provided on the common electrode layer in a position parallel to the row of the piezoelectric elements constituting the fluid ejection mechanism of the ink jet printer. This serves to provide a uniform and continuous formation of the connective wiring layer in the region opposing the piezoelectric elements and to reduce unevenness in the liquid ejecting characteristics among the nozzle orifices, and which is not taught by the prior art of record alone or in combination.

Claims 8 and 9 are allowed because they are directly or indirectly dependent from claim 7 above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
